

Employee Future Performance

Random Forest Model Evaluation Report

Model type: RandomForestClassifier

Test set size: 200 records

0.985

Accuracy

0.986

Precision

0.985

Recall

0.985

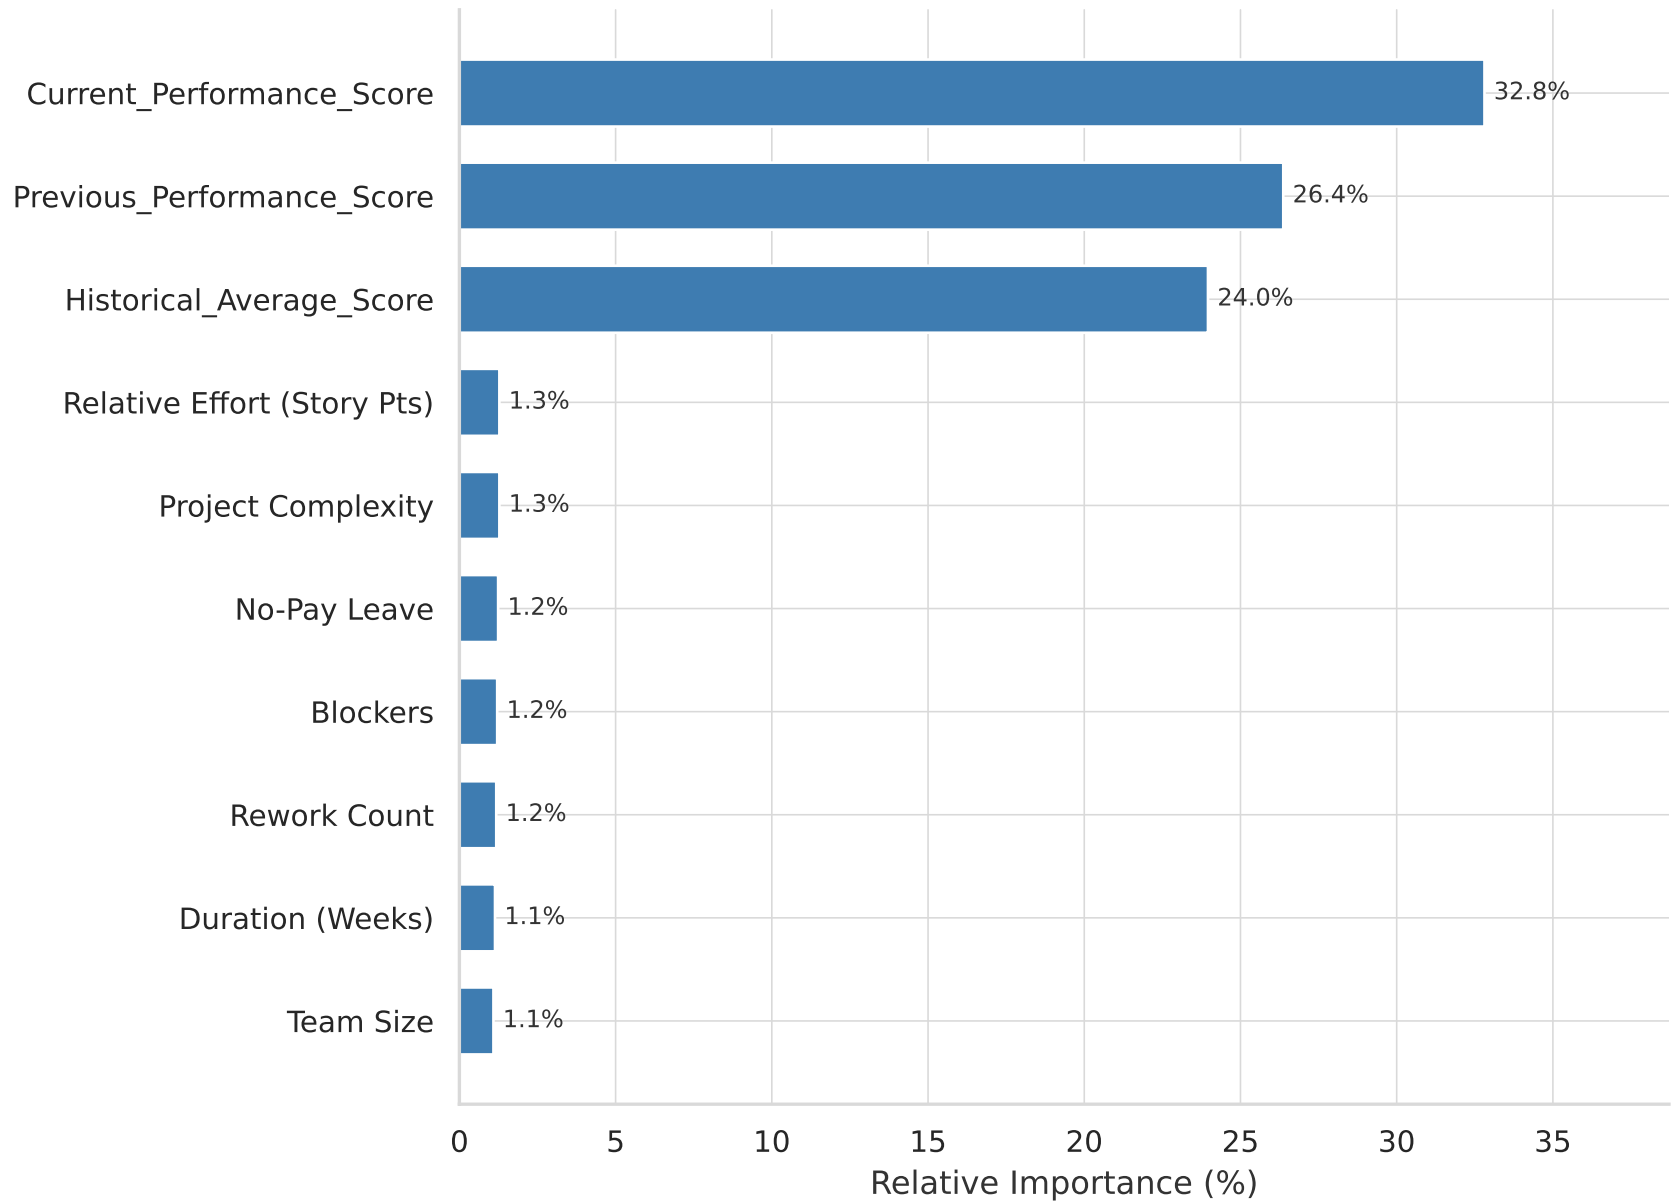

F1 Score

0.999

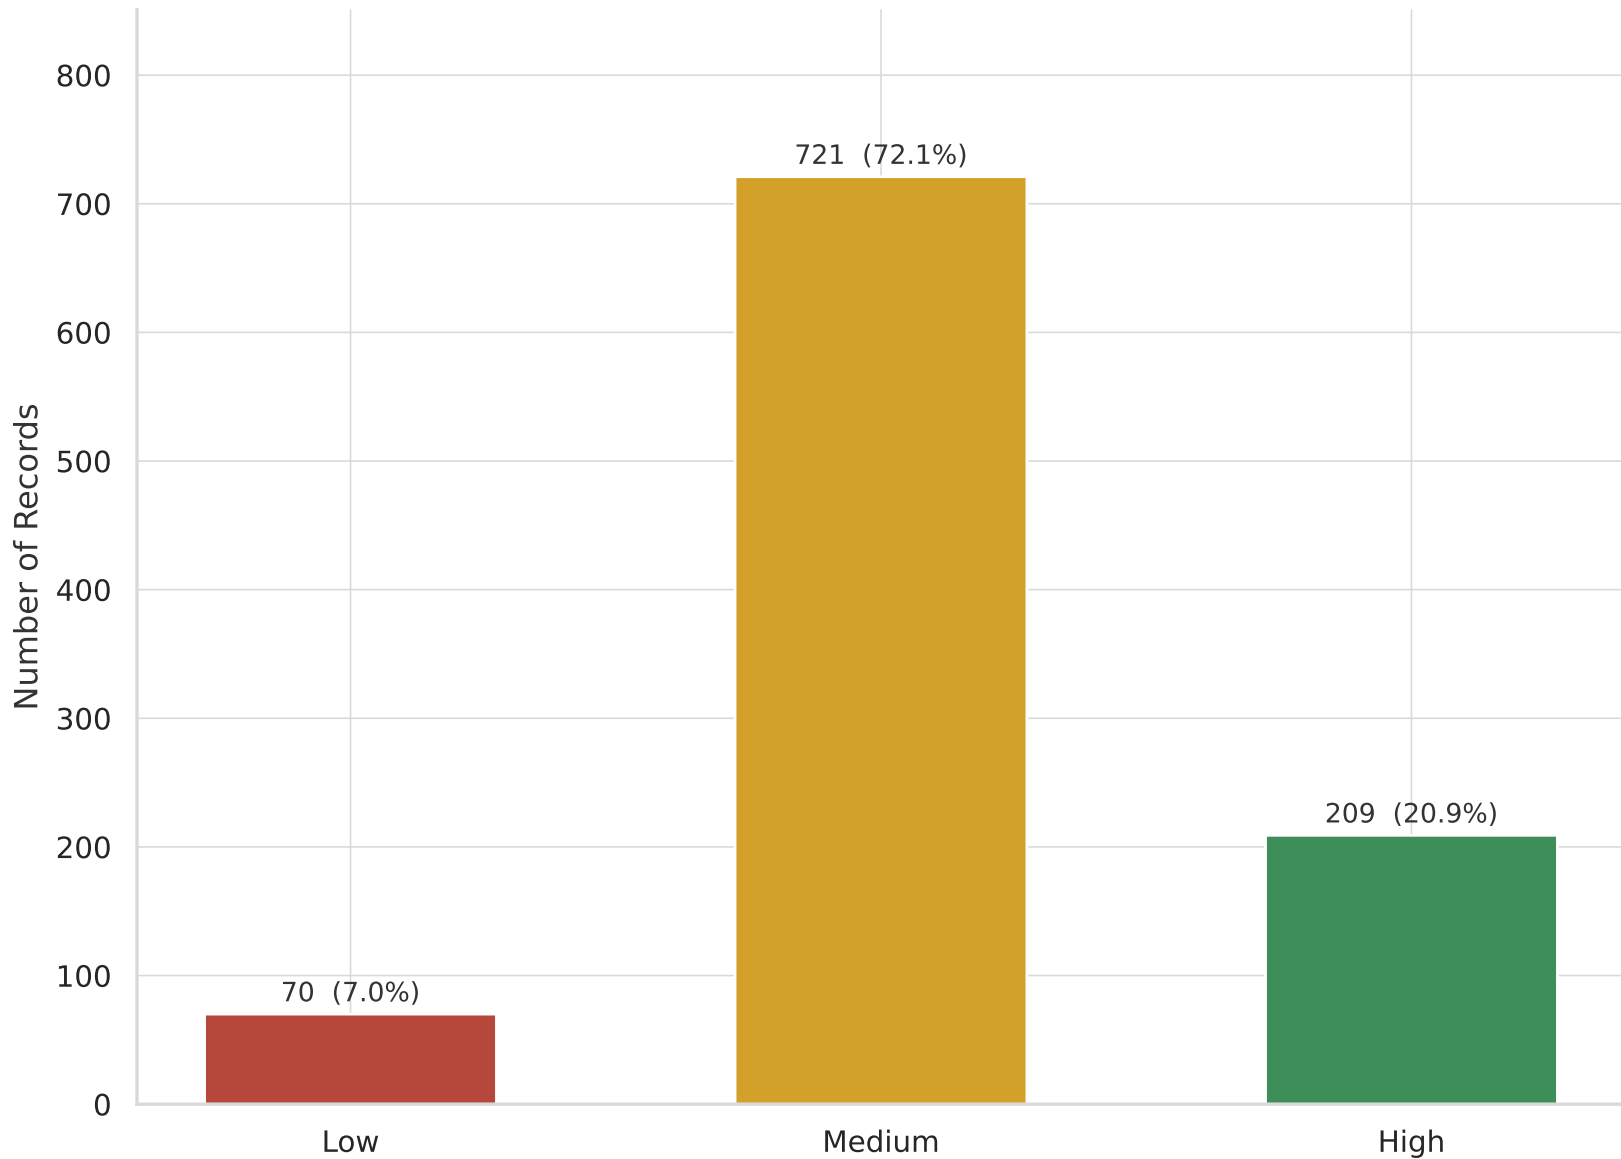

ROC-AUC

This report summarizes classifier performance for predicting an employee's performance band (Low / Medium / High) in the next quarter, based on current-quarter KPIs and history.

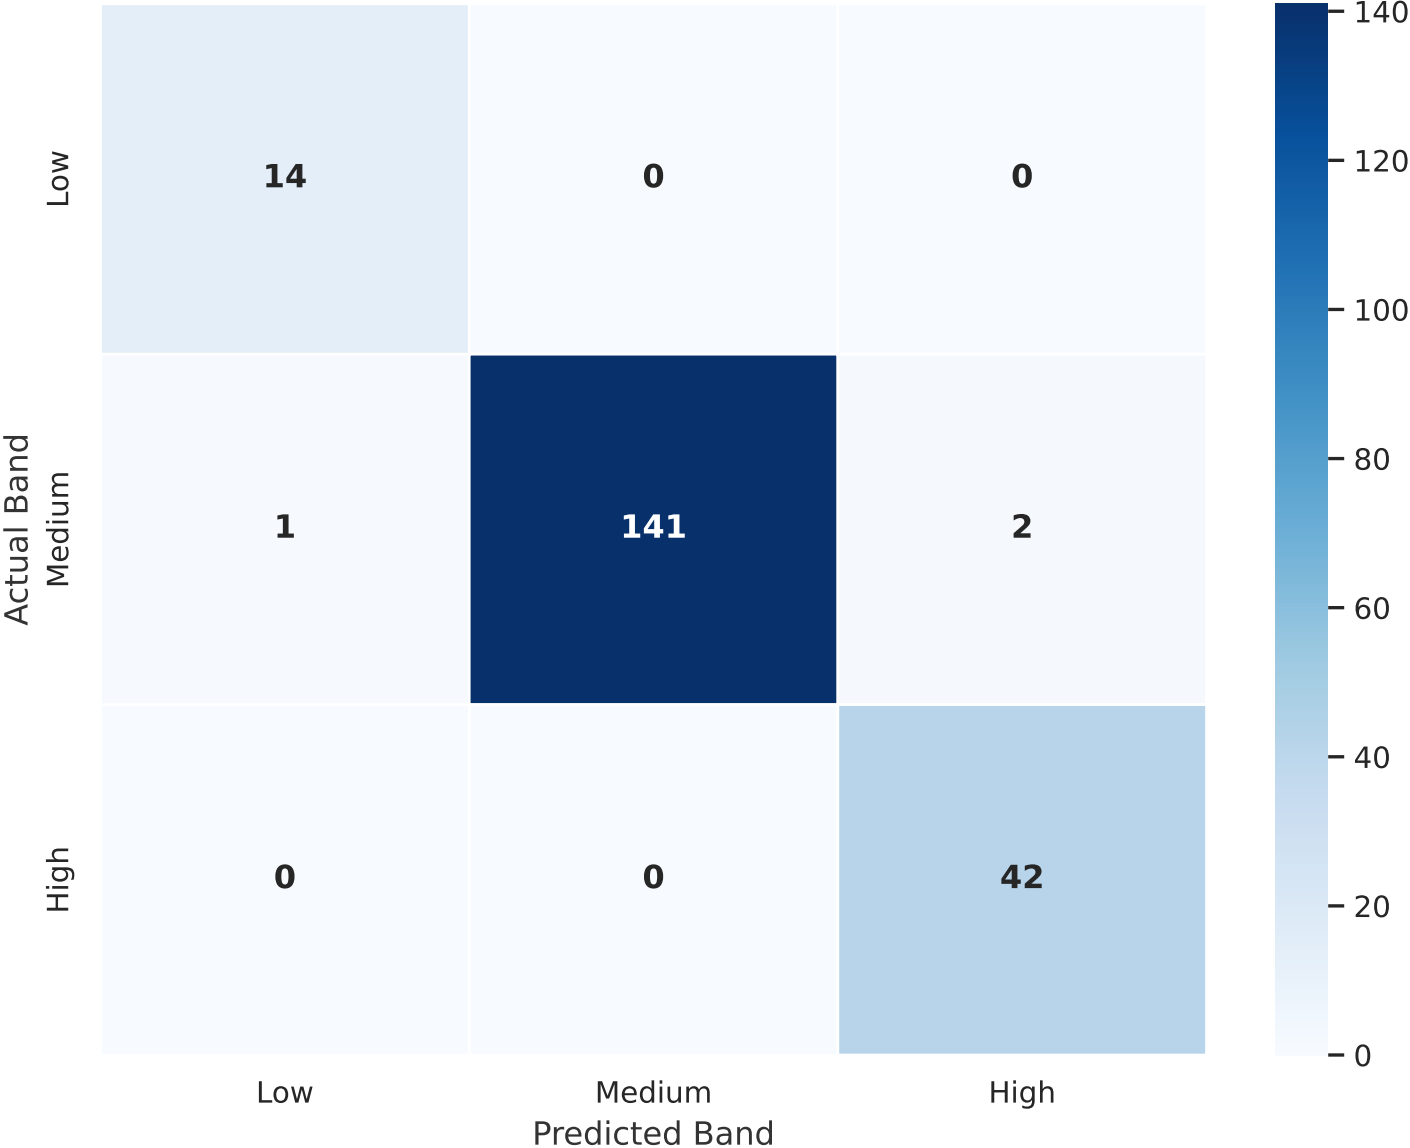

Top 10 Most Influential Features

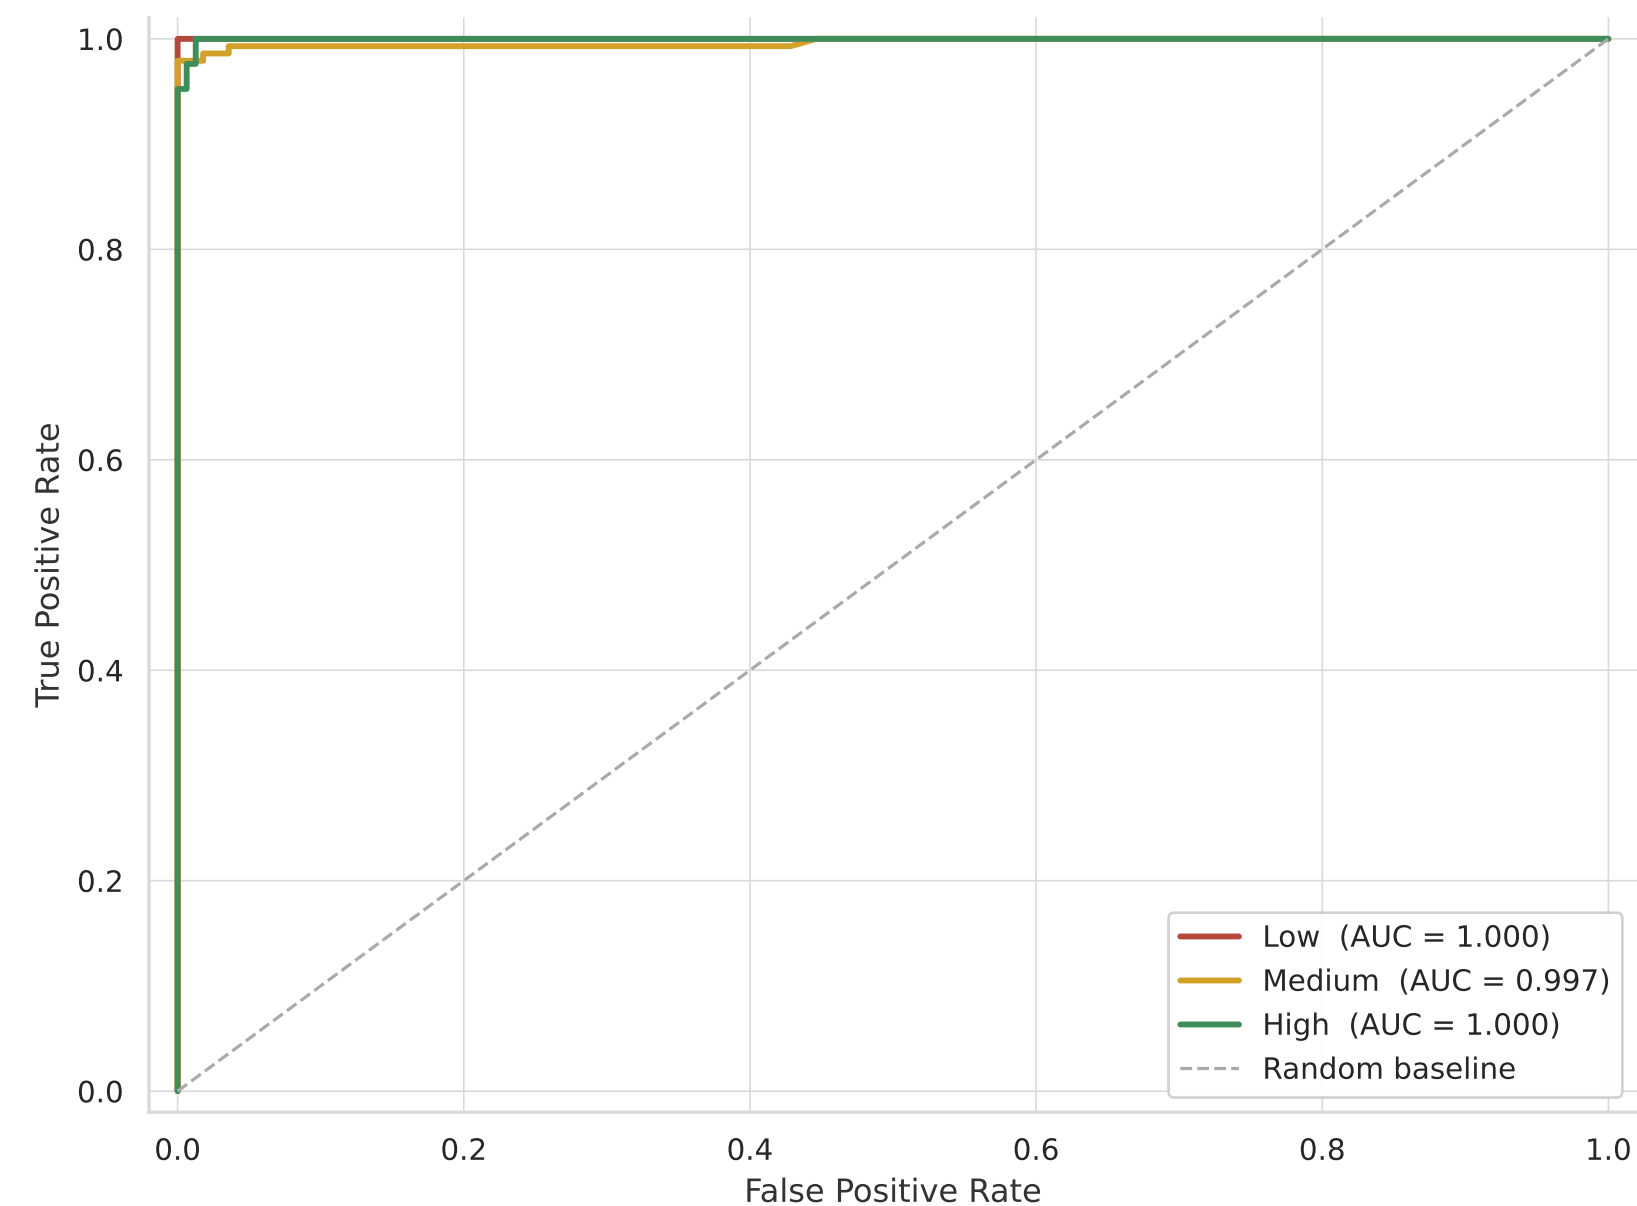

Future Performance Band — Class Distribution

Confusion Matrix — Predicted vs. Actual

ROC Curves — One-vs-Rest by Performance Band

Per-Class Performance Summary

Band	Precision	Recall	F1-Score	Support
Low	0.933	1.000	0.966	14
Medium	1.000	0.979	0.989	144
High	0.955	1.000	0.977	42
Macro Avg	0.963	0.993	0.977	200
Weighted Avg	0.986	0.985	0.985	200

Overall Accuracy: 0.985 | Weighted F1: 0.985 | ROC-AUC: 0.999
